This being my last president’s letter, I write with a great sense of achievement and excitement. Having been on the Board for seven years prior to being president, I thought I was ready. This year has been an incredible learning experience. I feel the Greater Springfield Dental Society (GSDS) is the best component of the state. We are in tune with the dental issues of our 16 counties and the state as a whole.

I began this presidency with intense issues that could be changing the way dentistry is practiced throughout the U.S. Two of the main issues were the formation of mid-level providers and the building of a new dental school in Missouri. Currently, it is my understanding that the mid-level provider proposal is dead in the legislature but could still be added in the future, and top on the agenda of the MDA is the insurance capped fee legislation. I thank those members of the GSDS who took time out of their offices to attend Legislative Day at the capitol and discuss this issue with our representatives and senators. When you see Drs. Misty Shelton, David Struble, Cheryl Haley, Jody Vance, Nathan Bauer, and Dan Kessler, thank them for their commitment to organized dentistry.

In March, A.T. Still University broke ground for the new dental school in Kirksville, MO. This school will be producing 40 to 43 new dentists by 2017. At the end of February, Aaron Washburn from the MDA presented a well-attended meeting for our society to discuss current legislative issues across the state. The meeting was very informative, and I encourage you to keep up with MDA Focus to follow the topics at hand. As always, our continuing education meetings are important to fund the Greater Springfield Dental Foundation and to come together with our peers. Thank you to those who attended “Forensic Dentistry” by Dr. Eric Wilson and “Updates to the OSHA Standard” by Dr. George Bailey.

Another issue which has gained steam in the area is the question of how to resolve the issue of dental pain patient visits to hospital emergency departments (EDs). Several of our society members have been working on the Dental Advisory Committee of the Greene County Health Commission. They have compiled data to see how many dental pain patients are visiting the EDs and how often. Now, how do we get these patients to come to our offices to resolve their pain, as we have been trained, and show that we can do it cheaper than a hospital visit? The Dental Advisory Committee of the Greene County Health Commission is working to address the issue. Look for more to come.

I attended a luncheon in honor of Drs. Darren and Sarah Mahaffey as Red Cross Everyday Heroes. The luncheon honored members of the Springfield area who used their talents and time to help others in our community. MOMOM will continue next year in Cape Girardeau on May 3-4, so mark your calendars. Thank you Darren and Sarah, along with all of the volunteers, for making MOMOM a great success.

On April 28th, the MDA is asking for a 2-4 person dental team to volunteer at a booth in partnership with the YMCA. The dental team will be handing out brochures and answering questions from 10:00 to 2:00. If anyone would like to volunteer, please let me or the GSDS office know.

Give Kids A Smile Day is undergoing some changes this year. Please sign up to help our schools. The Springfield Public School system and the GSDS have altered the process to help eliminate no-shows and utilize our offices more efficiently. If you have any questions or see ways we may improve the process, let the society know.

This year’s Board should be proud of their hard work and incredible time commitment. Most of our meetings lasted two and a half hours with many lasting three. I wish to thank you all and hope for the best for Dr. Mahaffey’s incoming Board of Directors. Last but not least, I owe a great deal of gratitude to my wife and kids. Jennifer did a great job of holding down the homefront, as there were many nights when I did not get to see or tuck my kids in to bed. Thank you Jennifer, Miles and Malorie.

Best wishes to the incoming Board of Directors. I will see you on April 26th at the Installation Banquet and proudly hand over the gavel to Dr. Darren Mahaffey.

Peace be with you,

A. Joshua Montgomery, D.D.S.
President, Greater Springfield Dental Society

“Life is like riding a bicycle. To keep your balance, you must keep moving.” — Albert Einstein

Every year, I have the privilege of working with a new leader and board of directors. On April 26, 2012, Dr. Darren Mahaffey will begin his term as the next president of the Greater Springfield Dental Society. He has assembled a great team to keep the dental society moving forward to promote the objective of the Greater Springfield Dental Society, which is to encourage the improvement of the health of the public and to promote the art and science of dentistry.

Another privilege that comes with this position is watching leaders grow as they navigate through their year. I would like to thank Dr. Josh Montgomery for his leadership and kindness throughout this past year.

Mark your calendars for the next “Smiles from the Heart” event on February 22, 2013, at Highland Springs. Dr. Alan Rosen and Dr. Patrick Bauer will be chairing this event. Bob Edmonds, Edmonds Dental, will be our “presenting sponsor” with a donation of $25,000.

Dr. Leo Tokarczyk and Dr. Brad Newberry are working very hard to plan some very exciting continuing education programs in 2012. A complete list of upcoming programs are listed in this newsletter and on the GSDS Calendar of Events located on the website at www.grsds.org.

It is a pleasure serving the Greater Springfield Dental Society!

Jean Harmison, Executive Director
THE BOTTOM LINE
ISN’T OUR BOTTOM LINE WHEN IT COMES TO YOU.

At Trust Company of the Ozarks, we know you are more than the sum of your investments, that’s why our view extends beyond your bottom line. Starting with advice that is both expert and personal, our goal is to help you reach your goals; because your portfolio is only as powerful as the dreams it can fulfill.

Call us at 417-890-7770, and we’ll answer. In person.
Or visit us online at www.trustcompanyozarks.com.
Cash Family Orthodontics-Honored by OTC

Through the years, I watched OTC develop and continually improve their dental programs. They are committed to providing a quality education and their graduates improve our dental community as a whole. As a token of our appreciation for OTC’s work, Dr. Tara, Shara and I decided to give a donation and were honored that they named one of the lecture halls for Cash Family Orthodontics.

OTC’s efforts have been spearheaded by Marge Bell and Janet Sell, but many in our own dental community contributed to the program’s success. Through the early efforts of Charles Mahaffey, Bob Nunn, Leo Tokarczyk, Brad Burks, Jody Vance and many others, the dental hygiene program was started and flourished. The assisting program has been equally successful with the assistance of Dr. Gary Dollens. What we as a community learned is through personal and continual involvement in all dental professional programs, we benefit by having exceptionally trained assistants and hygienists.

Please consider making a donation of your time or resources to one of the many local dental professional programs. It is both personally and professionally rewarding to help ensure our patients have the best possible care and our office has the highest quality assistants.

Dr. Jerry F. Cash
Cash Family Orthodontics

March/April 2012
The American Dental Association’s (ADA) Evidence-Based Dentistry (EBD) Champion’s Conference sponsored by the ADA Council on Scientific Affairs and the ADA Center for Evidence-Based Dentistry is a recent effort to help dentists integrate the most current science into patient care. The 2012 third annual Champion’s Conference took place March 8th–10th at the ADA headquarters in Chicago. The just over one hundred attendees, representing nearly every state in the union, consisted of private practice general and specialist dentists, public health dentists, dental academicians, and hygienists. The Greater Springfield Dental Society’s Dr. Frank A. Cornella and the Missouri Dental Association’s immediate past president, Dr. Mark Zust were the attendees from Missouri.

The Conference’s objectives were:

1. to explain the sometimes misunderstood principals of EBD,
2. to teach how EBD resources can be efficiently integrated into daily clinical decision-making, and
3. to recruit and train selected dental professionals throughout the United States to bring this information to colleagues.

To be considered for the Conference applicants must be an oral health care provider directly involved in patient treatment who resides and practices in the United States (though there was one Canadian attendee this year), and have a commitment to sharing the knowledge and skills gained from the Conference. As part of the selection process, applicants are asked to describe how they would share the information. Methods used by past participants included presentations to their local dental society, articles in their local dental society journal, EBD focused journal clubs, batch emails, staff education and facebook content.

Dr. Cornella hopes to tap into the resources of the Greater Springfield Dental Society as part of fulfilling his commitment to disseminate this information; perhaps though an evening CE presentation. In the meantime, dentists can start using EBD by exploring the ADA’s Center for Evidence-Based Dentistry website at http://ebd.ada.org/ where anyone (including patients) can find links to EBD resources such as PubMed and access ADA systematic reviews and ADA evidence-based clinical recommendations on a plethora of topics such as non-fluoride caries preventive agents, oral cancer screening, sealants, and the management of dry mouth. In addition the website, supported in part by a federal grant, allows ADA members free-of-charge access to the highly acclaimed Cochrane systematic reviews (and the ADA encourages its members to access Cochrane through the ADA site as future grants are dependant on demonstrated benefit.) The ADA EBD site, which is separate from the main ADA site, also contains instructions on how dentists can promote EBD by adding a link button to their office website.
Dr. Cornella said that though he is optimistic about the push for science-based clinical practice in dentistry and medicine, he realizes that human nature can be a powerful obstacle to relying on science-based reasoning. “When it comes to clinical practice,” said Cornella, “dentists tend to rely on the ‘art’ over the ‘science’ because they are self-confident individuals who trust and emphasize their own skills and eyes when it comes to assessing their clinical practice. Because they are intelligent individuals they can be skeptical and critical of EBD, but that is a good thing because skepticism and critical thought are the soul and heart of evidence-based practice.”

Cornella noticed through the years that his dental and medical colleagues seemed content with a mostly empirically-based clinical practice paradigm determined largely by the institutions at which they trained and that relied nearly exclusively on expert opinion—one of the lowest levels of evidence quality. “One problem,” stated Cornella, “is that we dentists do not actively seek out the best scientific information, a second obstacle is that we do not appreciate the magnitude of superiority that a controlled, randomized scientific investigation represents over our own anecdotal clinical observations and the opinions of experts. Being human, we tend to be overconfident in our ability to overcome bias and the ability to block the proclivity of our brains to see patterns where none exist. There is also an, ‘I-know-what-works-best-in-my-hands’ mentality, that is not necessarily contrary to EBD, but which can present a psychological barrier to EBD. And when colleagues lament that their clinical practice method is empirical of necessity because the research is lacking, I am reminded of a quote by the 19th century American humorist Josh Billings, ‘As scarce as the truth is, the supply has always been in excess of the demand.’”

“The crux of EBD,” concluded Cornella, “is our professional responsibility to our patients to never be satisfied with the truth as we know it; to never stop challenging with scientific scrutiny the conventional wisdom and our own wisdom.”

Dr. Cornella invites fellow GSDS members to contact him any time via email at oss@oralsurgeryofspringfield.com or by phone at his office if they would like to know more about EBD in general, the Champion’s Conference, EBD resources, or how to find the most current information regarding a specific clinical query. (If you have any objections to Dr. Cornella presenting a Continuing Education presentation regarding Evidence Based Dentistry, please email or phone Jean Harmison.)

The Nuts and Bolts of Informed Consent & Adverse Outcome Disclosure

Christine Pickard, MJ, BS, RN, CPHRM
Patient Safety/Risk Management Account Executive, The Doctors Company

Christine Pickard earned her Master of Jurisprudence Degree in Health Law from Loyola University Chicago School of Law and graduated from Oswego State University of New York with a Bachelor of Science Degree in Education. She has earned the Certified Professional in Healthcare Risk Management (CPHRM) designation from American Hospital Association/American Society for Healthcare Risk Management. She is a member of the American Society for Healthcare Risk Management (ASHRM), the Chicagoland Healthcare Risk Management Society (CHRMS), and the American Association of Legal Nurse Consultants.

Ms. Pickard is a registered nurse with over 25 years of hospital experience in interventional radiology, pediatrics, obstetrics, performance improvement, and risk management. For the past 16 years, she has worked in the medical malpractice insurance industry conducting risk and safety audits of facilities and physician practices nationwide. Her focus is on developing and presenting educational programs and workshops for physicians, medical office personnel, and allied health care practitioners. Prior to joining The Doctors Company, she held a faculty appointment as a Clinical Instructor in the Medical Radiography Program at the State University of New York Health Science Center at Syracuse.

Brian Malkmus practices in both trial practice and corporate law. Many of his clients are physicians, insurance companies and banks along with a host of commercial clients and individuals involved in both tort and contract disputes. Mr. Malkmus handles cases in Missouri state and federal court as well as the surrounding states.

By Daniel Becker, D.D.S.

Associate Director of Education General Dental Practice Residency
Miami Valley Hospital, Dayton, OH
Adjunct Prof. Life & Health Sciences, Sinclair Community College, Dayton, OH

September 21, 2012

Dr. Becker received a BS in Zoology at Ohio University in 1968 and his DDS from Ohio State University in 1972. He is currently Associate Director of Education for the General Practice Dental Residency at Miami Valley Hospital in Dayton. In addition to his academic responsibilities, Dr. Becker provides IV sedation services for dental practices throughout the Dayton-Cincinnati area.

Dr. Becker has published numerous articles in scientific journals, authored chapters in several textbooks and is Co-editor of Management of Pain & Anxiety in the Dental Office. W.B. Saunders / Elsevier Science Pub, St. Louis, 2002. He lectures extensively for organizations, colleges and universities on topics related to pharmacology, sedation and anesthesia, medical assessment and medical emergencies. Dr. Becker is noted for his pragmatism and his ability to convert otherwise dry material into formats that are both entertaining and informative.

Morning Session
Medical Urgencies and Emergencies in Dental Practice
“Prevention, Recognition and Management”

Description: This program will address fundamentals of preoperative assessment as well as a rational approach to recognition and management of medical emergencies in the dental office. After reviewing the essential pathophysiological features of each condition, a systematic algorithm approach to treatment will be presented. Equipment and medications will be thoroughly addressed, including sources for purchase.

Topics
- Preoperative Medical Evaluation
- Primary Assessment of Emergencies
- Principles of Airway Management
- Essential Emergency Drugs
- Conditions and Treatment Algorithms

Afternoon Session
Pharmacotherapeutics in Dental Practice
“Managing Pain and Infection”

Description: This program will address essential principles for preventing and managing postoperative pain and infection. Emphasis is placed on the fundamental pharmacological principles that provide a scientific basis for rational drug selection and appropriate use.

Topics
- Non-opioid and opioid analgesic regimens: a stepped approach to pain management
- Antibiotics: therapeutic and prophylactic regimens

Greater Ozarks Dental Health Newsletter
The Ronald McDonald Care Mobile of the Ozarks is seeking local dentists to serve on the Tooth Truck on a temporary basis during the months of April and May, 2012. Daily compensation up to $500 is available and there are many opportunities to provide a day or more of service. The Tooth Truck operates Monday thru Friday.

The Tooth Truck serves children primarily within 16 public schools in the city of Springfield. The majority of these elementary and middle school students are considered at risk. The Tooth Truck has been in operation for over ten years, providing more than $7 million in dental treatment for over 12,000 children.

To discuss specifics about the position, contact Program Director Mindy Muñoz by calling 417.875.3504 or 417.894.4652, or at mindy.munoz@toothtruck.org. For more information about Ronald McDonald House Charities of the Ozarks and the Tooth Truck programs, visit www.ronaldmcdnaldhouse.org.

Honest and trustworthy, experienced and efficient, EMA is the dental practice sales name-to-know.
Thank you for your support and endurance as members of the 2011-2012 Greater Springfield Dental Society.

Sincerely, Dr. Josh Montgomery

You wouldn't buy a CHEAP pair of shoes to run a marathon...

So why would you buy the CHEAPEST malpractice to protect your business and personal assets?

All malpractice policies are not equal. Policy types, coverage limits, service issues and financial strength are all important variables with each company.

If the price is too good to be true, then just what is it you are giving up?

Contact MDIS and let us help you determine what is important.

The choice is yours, but shouldn’t your decision be based on facts and not price alone?

Disaster Planning for Your Practice!

By Dr. Glen Ferrar

Friday – October 19th, 2012
9:00 a.m. - 12:00 p.m.
Howard Johnson Inn (3333 S. Glenstone Ave.)

Cost $95 Dentists, $50 for Staff
Three Continuing Education Hours

Disasters come in many shapes and sizes... You will learn:
• What key items are needed after a disaster
• How to prepare your practice for successful communication after a disaster
• How to develop an action plan to quickly resume your practice after a disaster
• What connections and relationships need to be established beforehand to resume dentistry after a disaster.

Please contact us at (417) 882-4117 if you require special assistance during this meeting.
We know that “office hours” is just an expression.

Your patients come first, even though their needs don’t always fit nicely into a typical work day. This can make it difficult to attend to your own personal financial needs, or the needs of your practice. The Private Client Group of U.S. Bank has financial experts who specialize in the dental profession. From day-to-day management solutions to personal finances, they can help streamline your money management and help you improve your financial health.
